INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/US03/41770

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)

Claims NONE YES

Claims 1-27 NO

Inventive Step (IS)

Claims NONE YES

Claims 1-27 NO

Industrial Applicability (IA)

Claims 1-27 YES

Claims NONE NO

2. Citations and Explanations (Rule 70.7)

Claims 1-17 and 22-27 lack novelty under PCT Article 33(2) as being anticipated by Wilding et al., US 5,304,487. Wilding et al. discloses cell lysing means comprising cell membrane piercing protrusions (24), extending from a surface of cell handling region (22), a pump for inducing flow through the flow system and a detection region (see col. 6, line 46 - col. 7, line 37).

Claims 18-21 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest disrupting a cell with a microdisrupter disposed on a probe, wherein the probe has a nanoarray disposed thereon and detecting binding of analytes to the nanoarray.

Claims 1-27 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
